

Pet Programs

We can't forget about your other family members! St. Michael's Holistic Natural Health Center even has a program for your canine and feline friends. While many humans take dietary supplements, it is assumed that every dietary supplement is also safe for your pet. Not true! In fact, some can even harm or fatally injure your dog and/or cat. We have special professional products designed especially for your pets. From vitamins, herbal products to specialized products made to enhance the immune system and other body systems. And one more thing. They are made right here in the USA!
